PROFESSIONAL EXPERIENCE

- **Scrum Master - Project Manager Wipro Limited, India
June 2014 – Till Date**

Project:

Product Modernization using APIs, AUS - India June 2014 – Till Date

SUNCORP has their own product called PROTECT, which is used to create a quote, convert quote into policy, maintain that policy and policy renewal. SUNCORP wants to launch some products which can be given as a package to specific line of business. As part of this project we have created new covers and then grouped them into multiple packages so that as per user business he can pick those packages. Apart from the mandatory covers user can choose optional covers also.

The latest Project involves building new light weight JSON APIs for policy creation and maintenance. Multiple teams of mainframe-Mule and digital technologies at different locations have been involved to deliver final product.
